## Skills

- HTML
- CSS
- JavaScript
- C#
- Node.js
- Express
- React
- MongoDB
- SQL
- GitHub

## Projects

### Muvee App
*February 2021*

- Integrated with The Movie Database API
- Displays categorized movies with responsive design for mobile view
- Card rotation CSS styling which displays movie details upon hovering a movie card image

### bLogPoster
*January 2020*

- Implemented GET, POST, PUT and DELETE request for blogs and user routes
- Implemented nodemailer to send verification codes to user for account verification and password reset
- User, blog, comment and reply data stored in MongoDB

### Basketball Score App
*January 2020*

- Integrated balldontlie API for player and team information
- Implemented useRef, useState and useEffect for getting and rendering data
- Created functionality to sort, store and remove players from an array

### Tower Defence 3D - Enemy Wave
*August 2020 - October 2020*

- Programmed clean, modularized scripts with scriptable objects and object-orientated programming using C#
- Designed 20 levels, balanced complex tower and enemy stats and created a score system
- Implemented binary serialization to save and load data
